

Whisper™

Veterinary Stethoscope

Hear What You've Been Missing™

Digital Respiratory Diagnostic Instrument and System

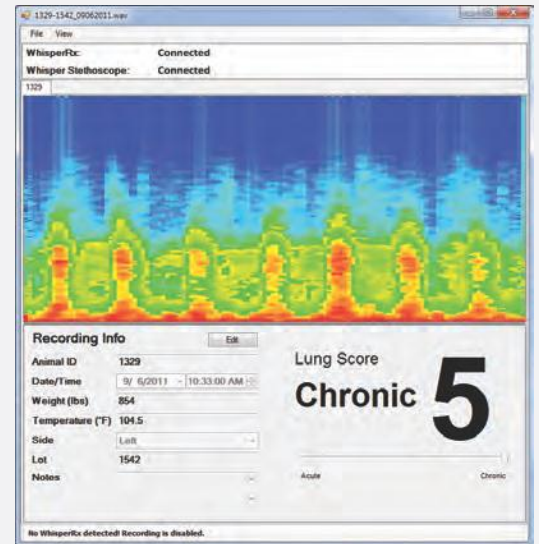

This stethoscope technology offers:

- 1 Lung sounds that are easy to hear and crystal clear.
- 2 Robust wireless transmission to a computer.
- 3 Specialized integrated software for lung sound analysis.
- 4 The ability to measure lung health in five different increments ranging from normal to acute or chronic.

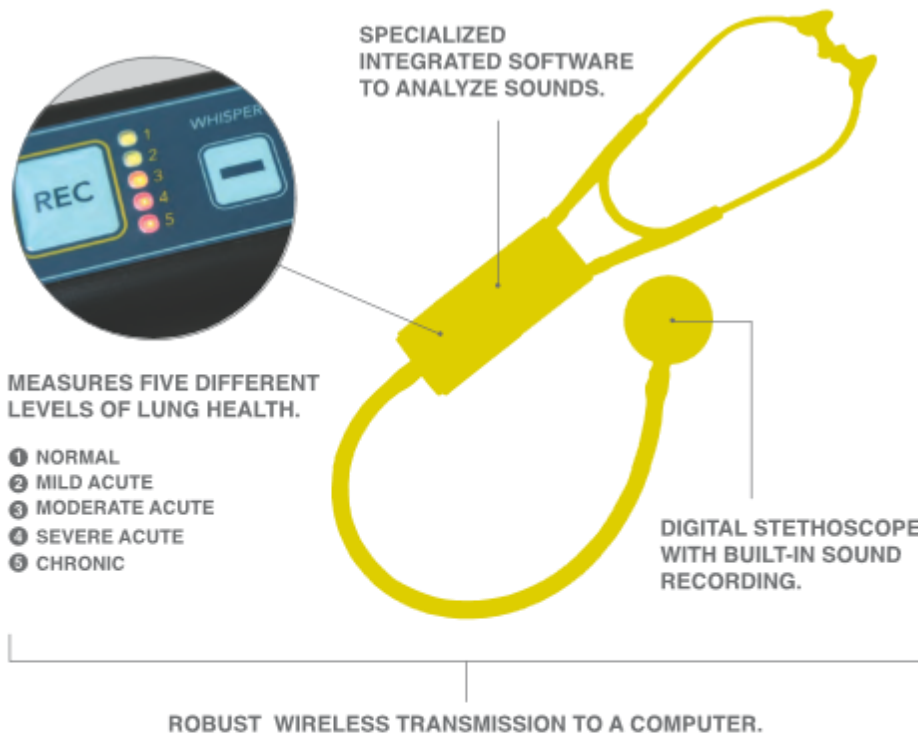

Stethoscope to Computer Communication

Quick and accurate wireless transmission from the Whisper™ Stethoscope to our computer software provides a platform for easy-to-analyze and effective information.

Diagnostic Stethoscope Features

Whisper Veterinary Stethoscope in Action

Whisper™ Veterinary Stethoscope has been designed and manufactured only for animals. Simply hold the stethoscope over the lung of the animal and 8 seconds later the stethoscope will beep, indicating it is wirelessly transmitting the lung sound to the computer. The highly specialized software running on the computer will analyze the sound and send the lung score to the stethoscope, lighting up the correct indicator within seconds. It's that easy!
